FAUN x IFAT 2026: VARIOPRESS URBAN – EFFICIENCY FOR URBAN ENVIRONMENTS

Osterholz-Scharmbeck / Munich, May 4th, 2026 – With the **VARIOPRESS URBAN**, FAUN presents at IFAT 2026 a solution specifically designed to meet the challenges of modern cities. Increasing traffic density, confined street layouts and growing demands for efficiency require new vehicle concepts – this is exactly where the VARIOPRESS URBAN comes in.

As a highly maneuverable all-rounder, it closes the gap between compact and high-volume refuse collection vehicles. Its space-saving design combined with high payload capacity enables efficient waste collection even in restricted environments.

With a body width of just 2.20 m and a tight turning radius, the vehicle remains fully maneuverable in narrow streets and densely built-up areas. At the same time, the body offers a volume of 9 to 12 m³, providing sufficient capacity for economically efficient collection routes.

The VARIOPRESS URBAN is designed for the collection of a wide range of waste fractions. In combination with the proven BARLIFT system, organic waste, residual waste, paper and other recyclables can be handled reliably – without compromising functionality or ease of operation.

FAUN consistently relies on proven technology: the VARIOPRESS URBAN is based on the established VARIOPRESS platform, delivering the same robustness and reliability in a significantly more compact format.

“With the VARIOPRESS URBAN, we are responding directly to the requirements of urban environments. Our goal is to ensure maximum efficiency and safety, even under challenging conditions,” says Julian Neuhaus, Head of Sales Refuse Collection Vehicles Germany at FAUN.

FAUN GROUP

The FAUN Group employs more than 2,200 people worldwide. As a body manufacturer, FAUN is one of Europe’s leading providers of waste collection vehicles and sweepers, with 18 sites in 11 countries. In 2025, the FAUN Group generated approximately €700 million in revenue. The company is headquartered in Osterholz-Scharmbeck, Germany, and is part of KIRCHHOFF Ecotec SE, the environmental division of the globally active KIRCHHOFF Group. In 2025, the group generated €3.2 billion in revenue with 13,550 employees across its four business areas: Automotive, Tools, Vehicle Conversions and Municipal Technology. The group operates 60 plants in 24 countries across five continents.
